3. One Operation Manual

Safety Notice

WARNING: Continued exposure to high volumes of noise in headsets can cause long-term hearing damage. Your ears will adapt to loud volume levels over time and damage your hearing even if you don't feel any discomfort. Keeping the volume at a safe level is important while using the headset. The louder the sound is set, the less time it takes to affect your hearing.

When putting the headset on, it is advised to turn the volume to a low level, and then slowly increase it to a moderate and comfortable level.
